Nekko is an AI/ML solutions Company partnered with AWS.
With deep expertise in building and deploying AI/ ML solutions for a wide range of usecases that cuts across industries and domains like GenAI, Computer Vision, Forecasting and more.
Our solutions help businesses enhance & automate a wide range of processes, derive insights from their data and manage existing AI workloads.

Nekko's marquee offerings:

1) Nexus-DMS is an AI-powered Document Management System (DMS), designed to digitize, organize, and retrieve documents seamlessly using advanced AI and LLM technologies.

Key Features
1. Document Digitization
* Converts physical documents into digital formats and integrates new documents into an automated pipeline.
 2. AI-Driven Classification
* Organizes documents into categories automatically, reducing errors and manual effort.
3. Cloud-Based Corpus
 • Provides centralized, secure, and scalable storage accessible from any device, anytime.
4. Natural Language Search
 • Enables intuitive document retrieval through conversational queries.
5. Analytics and Insights
* Offers on-the-fly analytics and actionable insights, including anomaly detection and next-best actions with its NexusAtom AI engine.
Benefits
* Efficiency: Speeds up storage and retrieval processes.
* Accuracy: Reduces errors in classification and retrieval.
* Accessibility: Secure access from any device via the cloud.
* Intuitive Interaction: Simplifies usage through natural language understanding.
* Scalability: Adapts to organizations of any size or document volume
*Security: Highly secured,Data is Encrypted in rest and motion

2) OrbitEye:
An AI computer vision driven PPE compliance, dress-code compliance solution that uses existing CCTV systems to improve workplace safety and compliance.
